Sketch ▪ Axure ▪ InVision ▪ Figma ▪ Adobe XD ▪ Adobe Creative Suite ▪ Front-End Development (HTML, CSS)

Professional Experience

➤ PRODUCT DESIGNER | Cohesion | Chicago, IL 2020 – Present

Researched, designed, and prototyped numerous features for mobile and desktop across multiple personas including tenant, and building management. Co-developed design system for updated look and feel across entire product.

- Designed and researched first-in-industry features and refresh existing features in intelligent building platform to increase competitive edge and better prepare for Series B funding.
- Co-designed and implemented design system and updated design direction to refresh look and feel of mobile and desktop platform. Improved user experience and standardized design elements while reducing user pain points.
- Presented monthly product design and development updates to company and key stakeholders.

➤ USER EXPERIENCE DESIGNER – SENIOR ANALYST | Avanade, Inc | Chicago, IL 2018 – 2020

Drove user experience research and design for mobile, desktop and application projects across industries. Represented design team during presentations for clients and internal leadership teams.

- Assisted in client-facing Design Lead Thinking workshops.
- Designed and developed a desktop and mobile solution for a Fortune 500 company to improve employee engagement and streamline scheduling processes within Microsoft Teams.
- Executed design and development of a modern SharePoint intranet solution, exceeding client usability needs.

➤ USER EXPERIENCE DESIGN INTERN | Logic Solutions and Quantum Compliance | Ann Arbor, MI 2017

Evaluated the design and UX for multiple client websites and mobile applications within a broad range of industries, applying recommendations and constructing prototypes based on user interviews to optimize usability.

- Oversaw the evaluation and redesign of the organization's flagship software and mobile application. Identified opportunities to reduce user pain points across operating systems and improve application performance.
- Identified and presented a simplified user interface for a sports medicine tablet application to align with tablet design best practices, securing the client's future business for further application development.

➤ LAB ASSISTANT, INTERN | University of Michigan Interactive Design Lab | Ann Arbor, MI 2016 – 2017

Contributed to the research and development of innovative cross-browser devices, industry papers and lab projects.

- Created UI design and code for a cross-device web browser. Developed a browser tool using HTML5 and JavaScript that allows users to take handwritten notes on stylus-enabled devices.

Education

Bachelor of Science, User Experience Design | University of Michigan, School of Information
